

NAUTI PRIMARY SCHOOL CLASSROOM PROJECT

Project Completion

The Nauti Primary School Project was completed in May of 2020, with handover to the Teacher and Student cohort taking place soon after.

Features:

- New 800m² two-storey Classroom Building, rated to withstand Category 5 Cyclones
- 12 Classrooms; each over 50m²
- 2 New Ablutions blocks; each with a dedicated septic system enabling natural filtration through a series of polishing chambers
- Sound insulated operable walls enabling the formation of an Assembly Hall
- Reconfigured rainwater collection and reticulation system to all New & Existing Buildings

New Classrooms for future generations

The Nauti School is currently servicing an 853 strong student cohort, with 42 teachers. The newly constructed Classroom Building & two Ablutions Blocks will assist in satisfying the Schools growing needs.

In addition to servicing the educational needs of the students, the Classroom Building will serve as a shelter for the Funafuti and wider Tuvaluan community. Constructed to the highest standards and design, the building is capable of withstanding Category 5 Cyclones.

Reeves International would like to thank DFAT, MEYS & Alexander & Lloyd for the opportunity to deliver such a great facility. We would like to extend our thanks to the community of Tuvalu for their hard work & persistence in delivering the Nauti Primary School Classroom Project, Reeves could not have built this classroom without the local support.

We hope our work brings joy and success to all the current and future students of the Nauti School.

Ongoing Involvement

Reeves International would like to thank the Tuvalu Ministry of Education, Youth & Sport (MEYS) and the community of Funafuti for their valuable assistance and support throughout the Nauti Project.

The School Completion has been a source of pride for both Local and Expat workers alike and is a great addition to the infrastructure of Tuvalu.

Reeves International continues its involvement and undertaking of work in Tuvalu, subcontracting to Infratec to assist in the installation of a 770kW of Solar PV and minimum 1 MWh of battery storage for the Tuvalu Electricity Corporation.

What else do we do?
